SUMMARY

Computer Science student and Linux engineer with deep hands-on experience in Arch-based environments, Wayland compositors, and self-hosted infrastructure. My daily driver is CachyOS with a fully custom Hyprland compositor — I containerize with Docker, automate with Bash, and deploy analytics stacks (Metabase, Apache Superset) on bare metal. I write open-source tooling in Rust and Shell. Actively seeking an internship where I can build reliable infrastructure and developer tooling.

SKILLS

LINUX & OS

Arch Linux, CachyOS, systemd, kernel tuning, Zsh/Bash, PipeWire

DATA & ANALYTICS

Metabase, Apache Superset, MySQL, MariaDB, SQL, BI dashboards

DEVOPS & INFRA

Docker, Docker Compose, Nginx, self-hosting, SSH, Git/GitHub CLI, GitHub Actions

PROGRAMMING

Bash (expert), Python, Rust, JavaScript, HTML/CSS, SQL

WAYLAND & DESKTOP

Hyprland, Waybar, Rofi, Hyprlock, shaders, Yazi, Foot

TOOLING

Neovim, Git, GitHub Actions, systemd, uBlock Origin, Zen Browser

PROJECTS

Hypr — Hyprland Dotfiles (Shell)

github.com/CyberSnake223/Hypr

Full Hyprland compositor environment: custom Waybar status bar, Rofi launcher themes, Hyprlock with shader-based backgrounds, and a cohesive color stack across 20+ application configs. One-command install, dynamic wallpaper switching, screenshot/recording scripts. Iterated over months on CachyOS/Arch.

WAYLAND

FEATURED

matugen (Rust)

github.com/CyberSnake223/matugen

Cross-platform Material You & Base16 color palette generator. Extracts dominant colors from wallpaper images and outputs cohesive theme palettes for terminals, editors, and window managers. Built in Rust for performance and compositor integration.

COLOR-GENERATION

CROSS-PLATFORM

matugen-themes / mkgit / mkgit-gh (CSS, Shell)

github.com/CyberSnake223 → 3 repos

matugen-themes: Template configs demonstrating matugen integration across CSS, JSON, and app configs (Waybar, Rofi, Neovim, Foot). —

mkgit: Bash tool that creates a GitHub repo with README and first commit in one command via the API. **mkgit-gh:** gh CLI wrapper for authenticated fork management.

B.C.A. — Computer Science New Delhi, India

In Progress

6+ public repositories across Shell, Rust, CSS, and JavaScript. Published tooling for the Hyprland/Wayland ecosystem. Focus on automation, desktop customization, and self-hosted analytics.

Actively seeking internship opportunities in **DevOps, systems engineering, or backend development** — remote-friendly or Delhi-based.
